

## KEY FEATURES

- 2 analog input channels (APx525)
- 4 analog input channels (APx526)
- AES/SPDIF digital I/O
- Typical THD+N < -110 dB [with AG52 option]
- > 1 MHz bandwidth @ 24 bits on two channels [with BW52 option]
- 1.2 M point FFTs
- Use Sequence Mode or new Bench Mode for ultimate flexibility and control
- Powerful automation and sophisticated reporting
- Support for the complete range of APx digital I/O options

## The ideal balance of analog performance and breadth of digital I/O

The **APx52x Series** of audio analyzers combines our award-winning user interface and legendary performance with a comprehensive range of modular I/O options. The APx52x Series brings AP innovations such as one-click measurements, code-free automation and sophisticated reporting to every interface in every combination.

### Outstanding performance and flexibility

The APx525 ships with two channels of analog I/O and our Digital Interface Option (DIO) with AES/SPDIF digital inputs and outputs. If you need more than that, APx525 is ready with a full range of choices, from additional channels of analog to a chip-level digital serial interface (DSIO), HDMI+ARC, PDM (Pulse Density Modulation) or *Bluetooth*® wireless technology with built-in radio.

Need higher analog performance? With the BW52 enhanced analog bandwidth option installed, you can make a million-point FFT spectrum acquisition at 24 bits, across a bandwidth of DC to over 1 MHz on two channels. And with the AG52 enhanced analog generator option, typical system THD+N is as low as -110 dB.

The **APx526** is a four channel version for those who require additional analog input channels..

### The power of APx measurement software

Across all measurements, the APx UI is fast and intuitive. Just click to select a measurement, then click to add a filter. Drag limits to set pass/fail points right on the results graph. Effortlessly specify computations for derived results. The APx generator can output steady tones, twin tones, sweeps, chirps, multitone or play WAV files as arbitrary waveforms.

### Automation and reporting

Repetitive bench tests and production testing can easily be automated with the built-in measurement sequencer and saved as a project that can be used with any APx analyzer. Access the API if you prefer: documentation for VB.NET, C#.NET, MATLAB, and LabVIEW is included. Create powerful reports with Microsoft Word that let you define your own formatting and add graphs, tables and logos.

APx526 4-channel analyzer

## OPTIONS

Select the options that match your needs. All models use the same software, so sharing projects is easy and modular hardware allows for future upgrades.

### PERFORMANCE

<b>AG52</b>	Adds analog square wave and DIM generation, higher maximum output and improved system THD+N
<b>BW52</b>	Adds two channel, 24-bit, 1 MHz bandwidth analysis

### DIGITAL I/O

<b>Digital Serial</b>	Adds interface for I <sup>2</sup> S, TDM, DSP	<b>PDM</b>	Adds direct connectivity for digital MEMS mics
<b>Bluetooth®</b>	Adds Bluetooth radio for Bluetooth audio test	<b>ASIO</b>	Adds software connectivity for PC audio interfaces
<b>HDMI+ARC</b>	Adds HDMI source, sink, monitor, aux and ARC I/O	<b>ADIO</b>	Adds Advanced Digital I/O and Advanced Master Clock modules

## Versatile, Powerful Audio Test

With its redesigned software platform, the powerful APx Audio Analyzer Series provides never-before-seen flexibility and usability. This bold new interface offers users two easy-to-use modes. Choose between Bench Mode for real-time visibility into device behavior across a variety of parameters, and Sequence Mode for fast production testing and automated measurements.

## APx Digital Options

APx audio analyzers offer world-class performance and flexibility. Our modular systems allow you to select the interfaces and options that make sense for the work you do, covering the widest range of digital I/O in the industry.

### HDMI

The APx HDMI option (HDMI+ARC) allows you to measure HDMI audio quality and audio format compatibility on devices such as surround sound receivers, set-top boxes, HDTVs, smartphones and tablets, and DVD or Blu-ray Disc™ players.

### Bluetooth®

The APx Bluetooth option is the best solution in the world for testing Bluetooth audio. No other analyzer combines integrated Bluetooth controls with APx's best-in-class speed, ease-of-use and performance.

### Digital Serial

The Digital Serial I/O option adds a multichannel digital serial interface. This provides a direct connection to chip-level interfaces such as I<sup>2</sup>S and supports all popular serial interface formats including left justified, right justified, and DSP.

### PDM

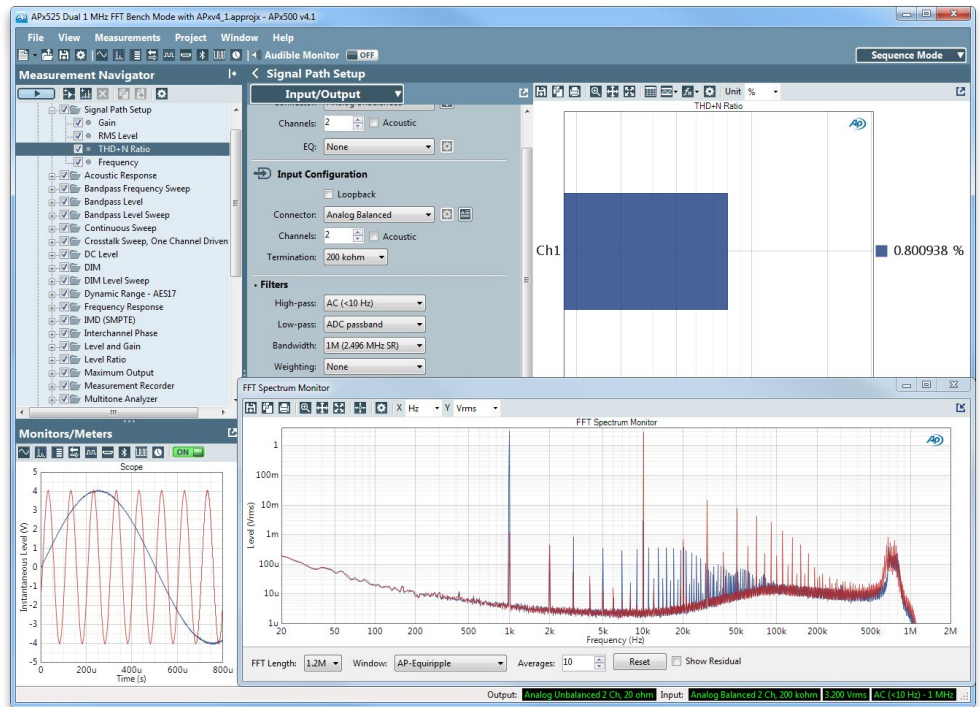

The APx PDM option provides direct connectivity for audio devices that have a PDM output (such as a MEMS microphone) or input (such as the decimator on a smartphone chip). In addition to all the standard audio measurements, APx provides variable DC voltage, variable sample rate, and a PSR (power supply rejection) measurement to test the device's full operating parameters. Also supports DSD, up to DSD256.

## KEY SPECIFICATIONS

### SYSTEM PERFORMANCE

**Residual THD+N (20 kHz BW)**  
 -105 dB + 1.3  $\mu$ V  
 Typical <-108 dB (1 kHz, 2.5 V)  
 Typical <-110 dB (1 kHz, 2.5 V) [with AG52]

### GENERATOR PERFORMANCE

**Sine Frequency Range**  
 0.1 Hz to 80.1 kHz  
**Square Frequency Range [requires AG52]**  
 10.0 Hz to 30.0 kHz  
**Frequency Accuracy**  
 2 ppm

**IMD Test Signals**  
 SMPTE, MOD, DFD; DIM [requires AG52]

**Maximum Amplitude (balanced)**  
 21.21 Vrms  
 26.66 Vrms bal, 13.33 Vrms unbal,  
 when  $F_s \geq 10$  Hz [with AG52]

**Amplitude Accuracy**  
 $\pm 0.03$  dB (+15° C to +30° C)  
**Flatness (20 Hz - 20 kHz)**  
 $\pm 0.008$  dB

**Analog Output Configurations**  
 Unbalanced and balanced

**Digital Output Sampling Rate**  
 22 kS/s - 216 kS/s

**Dolby / DTS Generator**  
 Yes (encoded file)

### ANALYZER PERFORMANCE

**Maximum Rated Input Voltage**  
 230 Vpk

**Maximum Bandwidth**  
 >90 kHz  
 >1 MHz [with BW52]

**IMD Measurement Capability**  
 SMPTE, MOD, DFD

**Amplitude Accuracy (1 kHz)**  
 $\pm 0.03$  dB (+15° C to +30° C)

**Amplitude Flatness (20 Hz - 20 kHz)**  
 $\pm 0.008$  dB

**Residual Input Noise (20 kHz BW)**  
 1.3  $\mu$ V

**Individual Harmonic Analyzer**  
 d2-d10

**Maximum FFT Length**  
 1248K points

**DC Voltage Measurement**  
 Yes
